Charging the Power Pack

To charge the Power Pack:

1. Connect the small end of the included Micro USB cable to the Micro USB input charging port on the Power Pack.

2. Connect the large end of the included Micro USB cable to an available USB port on your computer or an AC power adapter (not included).

3. The LED indicator light will flash RED every two seconds when charging to display device's power level:

   One Flash: The Power pack is approximately at 25% Charge.
   Two flashes: The Power pack is approximately at 50% Charge.
   Three Flashes: The Power pack is approximately at 75% Charge.
   Four Flashes: The Power pack is approximately at 100% Charge.

4. When done charging, remove the cable from the ports.

To check if the Power Pack is charged:
Press the LED indicator light once. If it lights up BLUE, it is charged. The LED indicator light will flash according to its level of power (see above). Press again to turn the light off.

Using the Power Pack

To charge devices with the Power Pack:

1. Connect the USB end of your device's charging cable to the USB output charging port on the Power Pack.

2. Connect the other end of your device's charging cable to your device's charging port (please refer to your device's user guide for charging).

NOTE: If the device you are charging draws too much power from the Power Pack, it will stop charging and go into standby mode. If this happens, unplug the device from the Power Pack, then recharge the Power Pack to get it back into charging mode.

Using the phone stand:
Flip out the built-in phone stand to use as a cradle for your smartphone.

Legal Information

Caution: Any changes or modifications not expressly approved could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
